Polycom® SoundStation2™ Avaya 2490

Feature and Benefits

Remarkable Voice Quality. Avaya® DEFINITY® Compatibility.

Feature	Benefit
Polycom Acoustic Clarity Technology	• Allows natural, interactive two-way conversations. Users don't have to wait for speakers on the far end to stop talking before breaking into a conversation. • Users can speak in a normal voice and be heard clearly up to ten feet away from the console. • More productive calls -- no need to repeat yourself.
Dynamic Noise Reduction (DNR)	• Automatically reduces room background noise – from fans, projectors, heating and air conditioning – for clearer sound and more efficient conferencing
Three cardioid microphones	• Provides 360-degree coverage so that everybody in the room can be heard clearly.
Intelligent microphone mixing	• Automatically selects the microphone closest to the person speaking, eliminating extraneous background noises
Microphone expandability (EX version only)	• Optional extension microphones increase coverage for larger size rooms
Backlit graphical display	• Convenient, easy access to important call information – phone number, number called, duration/progress of call
Auxiliary Input/Output Jacks	• 2.5mm Applications Port*: Provides connection to other communication devices, such as mobile phone and computers for hands-free conferencing. • RCA jack: Allows connections to other peripherals, such as an audio recorder or wireless lapel microphone.
Single-cord connection to phone console	• Eliminates cable clutter on the tabletop
Direct Connection to Avaya DEFINITY PBX port	• Eliminates the need for a separate 3rd party PBX adapter or for running a special analog line into the conference room. • Allows users to invoke basic PBX features including Conference and Hold.

* SoundStation2 Avaya uses a cable that connects to a standard 2.5mm headset connector. If your mobile phone model does not support this type of connection you will need an adapter (not included).

Connecting the SoundStation2 Avaya to a mobile phone is analogous to connecting a headset to a mobile phone. Not all mobile phone models recognize the SoundStation2 Avaya as a headset. For a list of mobile phones that are known to work with the SoundStation2 Avaya, please consult www.polycom.com.
